Propose built Data Center

Hyperscale

Independent powerhouse

7 Layers of touchless security system

Super Computing Center

Dual path Dark fiber optic from 2 different routes

6 matrix dedicated independent IT Hall Facility

Dedicated and shared working space

25 kN/m2 Floor Load Structure Design

Service Corridor to separate IT Hall and utilities area

About MettaDC

MettaDC facilities are designed to deliver exceptional customer experience. We are providing an Integrated Data Center System Platform to bring together all the element of security, interconnection, power reliability and efficiency infrastructure facility to accelerate and enlighten value creation for our customer business, including financial enterprises, content and digital media services, global networks, and cloud service providers.

DATA CENTER SERVICES

Shared Colocation

Reliable and secure facility to cater 1000 racks per floor and power up to 10kW per rack with 25kN/m2 floor load. Our Data center is customizable for high-density requirement.

Meet-me-room

A truly carrier neutral provider. We provide reliable network services and connections on the network provider of your choice. 4 MMRs available per floor from dual cable pathways (manhole).

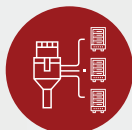

Cage Space & Private Suite Configurations

Dedicated secured solutions with on-demand customizable security layers, based on customer's procedures and policies.

Interconnection

Interconnectivity such as internet, bandwidth, cloud connect, internet exchange and private connection

Cross connect & pre-cabling

Hardwired cable that provides a direct connection between customer rack into MMR room via Fiber Optic

Remote Hands

On-site technical team, to support customer with quick respond

Dedicated Working Space

Smart meeting room available on the 2nd and 3rd floor. On-demand meeting room for Dedicated workspace or shared for customers.

MettaDC ID01

MettaDC ID01 is located in Jababeka-West Java, 60km distance from Soekarno Hatta International Airport . With highly-scalable capacity of 3,000 colocation racks.

A purpose-built, Uptime TierIII certified. 3 storey data center building with 10,000 sqm total for IT hall facility and sustainable for earthquake until 9RS

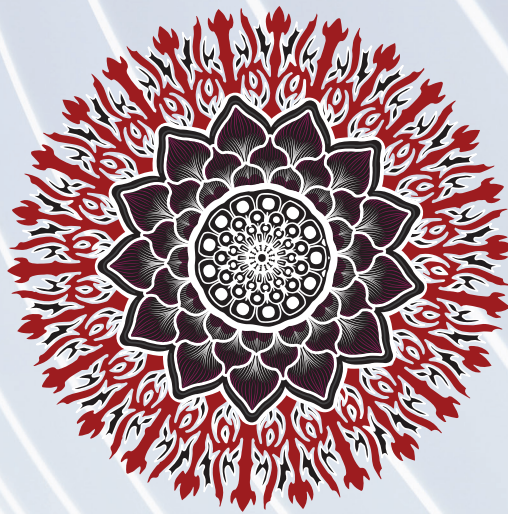

Compliance

General specifications

Location	
Area	Bekasi Area (Outer Jakarta) – Jababeka Industrial
Access	About 38km distance from MettaDC ID02
Structure	Purpose-built data center; 2 IT Hall x 3 (three) story buildings. 6 matrix dedicated independent IT Hall facility
Loading	Loading capacity of floor : 2,500 kg/m2
PUE	1.4 – 1.65
Data Hall	- 500 Racks per data hall (6 data hall) - Average rack density 10kW - Rack dimension: 48U, 600mmx1200mm
Power	
Power Receiving	2 (two) power plan with dual source each
Critical IT load	30MW
UPS	UPS System 2N configuration
Generator	Diesel generator 2N configuration
Power Provision	Dual power feed to each rack, maximum high density 15kW (Upgradeable 20 KW/Rack)
Cooling	
System	Air cool system in redundant continuous cooling (N+2)
Blow-out type	Down flow
Fire Protection	
Smoke Detection	Early warning smoke detection system (VESDA)
Fire Suppression	Fire protection Double Interlock and NOVAC
Security	
Camera	CCTVsurveillance cameras
Guard	24x7 onsite security presence
System	Car plate recognition, Face recognition, UVSS, QR Code Authentication, anti-tailgating system, IC Card, Fingerprint, Iris Recognition and PIN (7 Layer security access)
Network	
Type	Carrier-neutral
Services	15 carriers, Internet, Internet Exchange and Crossconnection
Certification	
Certification	On progress: Uptime Tier III (Design, TCCF, TCOS), ISO 27001, ISO 14001, ISO 9001, ISO 5001, PCI-DSS & TVRA
Other Facilities	
Other Facilities	Customer portal, Smart shared meeting rooms, Operational Car, Electric Staging Staion, Lounge Area, Working Space (shared & open space), Entertainment Room
